ASME - BPE Fitting Product Change Notice

The new 2014 Edition of the ASME-BPE Standard, published October 10th 2014, includes changes that all ASME-BPE concentric and eccentric reducer fittings will be manufactured to the new published dimensions. This change will become effective 6 months from the date of issuance for manufacturing product. The older, longer length reducers will be available - but will become "Specials" effective June 15th, 2015 and carry higher list pricing. Please see attached dimensional charts that show both the older long length reducers and the new short length ASME-BPE reducers for your design purposes moving forward. Please contact us if you have any questions regarding this change.
