### WELD FITTINGS....

Weld Fittings are used on permanent installations where process piping and equipment can be cleaned in place (CIP) and removal from the system is not required. Weld Fittings are offered in nominal tube sizes 1/2" through 8" in T304 and T316L materials. Uniform wall thickness for 1/2" through 3" sizes measure .065 (16 ga). In 4" size, wall thickness measures .083 (14 ga), 6" and 8" .109 (12 ga).

VNE offers Polished ID and OD Fittings for immediate shipment. Other polished combinations may be ordered. Our Weld Fittings meet all 3A requirements.

The "LA" designated product offering is available as a cost-effective alternative to our existing line of fittings and meets the industry expectations on high quality that you have come to expect from VNE. Fittings listed as [LA] are available in both our traditional offering and LA designated offering. Example: E2S-6L1.5 (Traditional offering on 3A weld by weld 316L stainless steel 90° elbow with tangents) and LA-E2S-6L1.5 (LA alternative on 3A weld by weld 316L stainless steel 90° elbow with tangents). Fittings listed as [LA ONLY] are products exclusive to the LA fitting product category.

### BUTTERFLY VALVES

Butterfly Valves are available in Manual, Air Actuated, or Air Actuated with two Micro switches and a Solenoid Valve. Clamp or Weld ends are standard. Other connections are available upon request.

Available seat materials include Silicone, Viton®, and EPDM. Size range from 1" through 6". All products contact surfaces are available in either T304 or T316 stainless steel.

### CHECK VALVES

Check valves are widely used for both sanitary and industrial applications to prevent backflow of product.

VNE's ball check valves are designed to allow full product flow during processing. Once the product flow stops the ball rolls back to seat at inlet, preventing back flow. Ball Check Valves are commonly used with liquid products.

VNE's spring check valves are designed to assist closure pressure to create a positive shutoff. They are commonly used with liquid products.

Both valves are offered with clamp and weld ends. Other connections are available upon request. Sizes range from 1/2" through 4" in T316 stainless steel. VNE's Check Valves meet 3A Sanitary requirements.

VNE's Air Blow Check Valves are designed to evacuate lines of product or CIP solution. Air Blow Check Valves are made of T316L Stainless Steel and are offered with EPDM or Viton® Elastomers.

### BALL VALVES

Ball Valves are used in a wide variety of high pressure applications. Two factors make them popular. First, a full unrestricted flow that allows no product restrictions through the valve. Second, the three piece design and the removal of a minimal number of bolts allows service to be performed without the removal of the complete valve from the line.

VNE offers TWO and THREE way ball valves made of T316 (CF8M) stainless steel. Ball Valves are available in Manual, Pneumatically Actuated, and Electrically Actuated versions. We also offer a full line of control options. Limit switches, Solenoids, and Positioners can be included with your automated valve assembly. VNE Ball Valves feature PTFE seats that are easily removed. Clamp and Weld ends are standard. Other connections are available upon request. 1/2" -4" sizes are available. VNE Ball Valves meet FDA and 3A requirements.

### PVA VALVES

PVA Valves are available in Manual, Air Activated, or Air Actuated with an electronic control head. Configurations can be shut off, Divert or Tank outlet. Connections consist of Clamp, Weld, Bevel Seat, and E-Line.

VNE's PVA Valves are made of T316L stainless steel which meet all 3A requirements and are offered in 1.0" through 3" sizes. Other connections available upon request.
